

Inclement Weather

The Course at Manatee Cove and its participants shall follow SLD 45 Instruction regarding preparation and response to severe weather. Weather alerts are communicated to patrons via the installation 'giant voice' system, air horns on the course and staff touring the course.

All personnel outdoors shall seek shelter immediately when advised of the approved shelter locations; clubhouse and cart barn. Patrons may remain on the deck of the clubhouse provided they are under the main roof. Patrons may resume outdoor activities when dangerous conditions have passed, as communicated by the installation Command Post.

The following inclement weather conditions are communicated to ensure patron safety:

- Phase One Lightning Watch. Potential for lightning exists within a certain range of Patrick SFB. Personnel shall prepare to seek approved shelter immediately if phase two occurs.
- Phase Two Lightning Warning. Lightning is occurring within 5 nautical miles of Patrick SFB. Personnel must clear the course and all outside areas and seek approved shelter immediately.
- Storm cells, potential for tornadic activity and high winds. Personnel shall follow the guidance received by the installation Command Post.

The general manager and superintendent reserve the right, with FSS Commander approval, to enact restrictions to play areas in response to inclement weather forecast or post event. The goal is patron safety. At no time will a "play at your own risk" policy be authorized.

Message from the General Manager

Welcome to the Course at Manatee Cove. We hope your experiences here are enjoyable and enable you to feel appreciated for choosing to provide us the opportunity to serve you. Our mission is to provide outstanding customer service via a well-trained and knowledgeable staff, a challenging and well-maintained course, a well-stocked pro shop and quality year-round programs and events.

Designed by Robert Trent Jones, Sr., our scenic 18-hole, par 72 course is a gem of the Air Force; distinguished as the best golf operation in this Service. Patron safety is very important. Please be mindful of weather conditions and advisories, fellow players around you and wildlife on the course. Rules are posted on each golf cart to facilitate pace of play. The Florida climate is extreme; players are encouraged to stay well-hydrated and use adequate sun protection. I hope to see you on the course!

Steve Waggoner

Message from the Superintendent

The Course at Manatee Cove occupies 140 acres of the south end of Patrick Space Force Base. 29 acres are made up of water canals and ponds. In addition to being an integral part of the drainage system for the Base, several different species of fish, turtles, birds and alligators call our water features home.

Constructed in 2007, the greens are large and undulating. They feature a salt-tolerant turfgrass called seashore paspalum. In 2020 and 2021 the fairways were converted to the paspalum turfgrass as well.

The golf course features over 1,500 Palm trees, 36 sand bunkers and an irrigation system with 1,155 sprinkler heads throughout the golf course that is capable of watering the entire golf course except the extreme out-of-play areas.
