

STORM SAFETY MINIMAL REQUIREMENTS

- The following is a quick list of the minimal requirements if your vessel is to be kept in the water during a storm.
- Mooring lines at least doubled and positioned to accommodate rising water (bow, stern, and spring)
- Chafing gear in place as needed
- Appropriate fenders in place
- All canvas removed and stowed (to include Biminis tops, side curtains, fly bridge cover, windshield cover, eisen glass, etc.)
- All sails removed and booms properly secured
- Remove any other items that can become "torpedoes" in high winds (life rafts, deck furniture, satellite dishes, fishing gear, deck/cockpit cushions, etc.)
- Ensure your dock box is locked and secured on the dock or remove it (see maintenance staff for assistance if needed)
- Disconnect and store power cords and hoses - electric is turned off as we hit the 24 hour - shut off electrical devices to protect battery
